WOERNER

Commitment to Compliance with the EU Regulation on Deforestation and Forest Degradation (EUDR)

Woerner + Cie. GmbH commits to strict adherence to the EU Deforestation Regulation (EUDR), which comes into force on December 30, 2025. As a company, we recognize our responsibility to actively contribute to curbing global deforestation and forest degradation and to promote the preservation of our natural resources. Sustainable actions and the conservation of our natural resources are central values for us, which significantly contribute to securing our shared future. In this context, Woerner + Cie. GmbH commits to consistently implementing the provisions established under the EUDR:

Due Diligence
To ensure that our paper products do not contribute to deforestation or forest degradation, we commit to the implementation and maintenance of an efficient due diligence process. This particularly includes the comprehensive review of our entire supply chains and close and consistent cooperation with our suppliers to ensure compliance with the EUDR.

Traceability
Through the complete collection and storage of all relevant data regarding our raw paper and paper product suppliers, we ensure full traceability of the origin of our paper products. It is our goal to cooperate exclusively with suppliers or paper mills that offer binding assurances of EUDR compliance. We guarantee not to source paper products from questionable origins and actively work to primarily source our raw paper from Germany or other European countries to ensure the highest standards.

Risk Management
Based on the collected data, we regularly conduct comprehensive risk assessments. If risks are identified, we take immediate action to mitigate them to ensure full compliance with EUDR requirements for our products.

Documentation
Furthermore, we commit to keeping comprehensive records of our measures to comply with the EUDR and to make them available to the competent authorities upon request.

Currently, many implementation details of the EUDR are still not clearly defined. As soon as the precise requirements for the implementation of the regulation are clarified and we have received the necessary information from our raw material suppliers in full, we will promptly take the aforementioned measures, embed them permanently, and regularly review their effectiveness.
